

# Glass Lampworking

Get **hi-pressure natural gas right from**  
**your utility gas line with the**  
**G-TEC Natural Gas Pressure Booster**

**Natural gas is the best choice for glass lamp working and a G-TEC System will supply all the high-pressure gas you need!**

A G-TEC System connects to your building's natural gas line then boosts the pressure to 5 psi, 10 psi, any psi! The system fills a cylinder which supplies gas to your torch. As the cylinder empties it is automatically refilled, giving you a constant supply of high-pressure natural gas!

G-TEC Systems are certified by CSA – International and can be installed anywhere, even in buildings that prohibit propane!

### **Get High Quality performance**

- Natural gas is easier to work with – the flame is softer to control work better
- Get cleaner reducing fires without soot and glare

### **Natural Gas Is The Safest Fuel Gas**

- Eliminating propane storage reduces potential hazards
- Natural gas is lighter than air – leaks rise and dissipate

### **Save Money And Eliminate Purchase Orders**

- Save up to 50% on fuel costs compared to propane
- Pay only for the gas you use...after you use it
- Stop paying cylinder rental and delivery charges

### **Never Change Fuel Gas Cylinders**

- G-TEC Systems provide a continuous supply of gas and cylinders automatically fill and refill themselves
- Never run out of fuel in the middle of a project

### **Easy To Use**

- Simple to install in any facility with natural gas
- Quiet operation allows installation anywhere

 **G-TEC Natural Gas Systems**
